

Mobile SDK Application Form Example

Name: Alex Reader

Company: Alex Reader Security Solutions

Company accessing the Mobile SDK documentation: App Guys will be accessing the documentation. With experience developing for iOS and Android, App Guys have developed more than 300 apps.

Site(s) where the Mobile SDK will be implemented: Jim's Gym and Shared Space Conference Centre, Toronto.

Third-Party Platform Integration: The integration will be done between the native Jim's gym core API, our native iOS, Android applications and ICT. The ICT mobile credential will provide end to end business access to any Jim's gym member.

Extent of Mobile SDK Integration: We will use the IC mobile SDK to manage credentials from the Jim's gym management portal, as well as into the Jim's gym shared space application to provide end to end business access.
